Resurrection is a foreign word for many people. The Biblical Easter texts sound too much like fairy tales when they are taken literally. But what kind of texts are these and what are they about? What are their claims about this Jesus who represented an incendiary message of life and freedom and was executed on the cross? Why did he have to die? What is meant by his resurrection from the dead and by the Easter experiences of his disciples? What can resurrection signify in living and dying? What is its provocative sting to this day?

In this book, Hans Kessler examines the sources and foundations of the belief in resurrection and traces it back to a fundamental question for the Christian understanding of God: Who is this God, confessed by Christians as the God who wants all-encompassing and boundless life for every human being?
